About Me

Product Manager with 4+ years launching and scaling digital products end to end for enterprises, startups and government, across mobility, fintech, social commerce and events. Products I own serve **150K+ users**, and I lead **20+ engineers** across squads. Hands-on depth in payments, KYC, loyalty, fraud prevention, data analysis and AI-powered features. Currently pursuing an MBA in Strategic Management.
Key clients: ExxonMobil · Hitachi Rail · Egypt Ministry of Transportation **Key markets:** Egypt · UK · Gulf

Work Experience

Product Manager II – TrianglZ (Software House)
July 2022 – Present | Alexandria, Egypt
Lead end-to-end product strategy and delivery across enterprise and public-sector platforms; lead 20+ engineers across squads and mentor a junior PM.

Mobil Care (Live Android App – ExxonMobil Egypt)
April 2023 – Present
A large-scale digital transformation connecting ExxonMobil with commercial vehicle owners, fleet operators and drivers through one mobile and enterprise platform.

- **Engagement & loyalty:** Built the end-to-end loyalty program (reward logic, earning and redemption rules, Quick Challenges gamification and admin governance controls), scaling adoption to **85K+ users**.
- **Payments & reward economics:** Integrated Fawry (Egypt's leading payments network) payments into the rewards flow of a **multi-million-EGP rewards budget**; designed financial fences (eligibility rules, payout caps, redemption controls) and owned reconciliation, refunds and failed-transaction handling.
- **KYC & identity verification:** Owned KYC for national ID and driver license verification, securing onboarding and reward eligibility.
- **Fraud detection & mitigation:** Led fraud investigations into reward abuse and turned findings into detection rules and prevention logic, **cutting abuse by 95%** and **protecting $100K+ in rewards**.
- **Deep data analysis:** Built the lifecycle funnel (Acquired → Active → Engaged → Retained) across Fleet Owner, Single Owner and Driver personas, with three-scenario engagement forecasts and AI-assisted behavioral analysis to refine reward logic and segmentation.
- **Ecosystem growth:** Led growth discovery that repositioned the product from a fleet tool into a commercial vehicle ecosystem; launched the Single Owner persona, real-time trip tracking and expense management.
- **Squad leadership:** Lead a **10-person cross-functional squad**; authored the product SOP and Statement of Objectives (SOO); shipped **15+ releases** since launch.

AQ Metro (Abu Qir Metro Ticketing & Payments App – Hitachi Rail)
September 2025 – Present | Pre-launch, launching Q2 2027 (iOS & Android) | 500K+ projected users
A flagship national infrastructure project: the mobile ticketing and payments app for the Alexandria Metro.

- **Discovery & MVP definition:** Led discovery and defined 10 core app features for a phased digital mobility ecosystem, covering user journeys, onboarding and guest access.
- **Payments:** Defined the payment layer (ticket purchase payments, CSC card top-up and subscription plans), including reconciliation, refunds and failed-transaction handling.
- **Pre-launch development:** Authored the CSC physical card PRD and RSD: 9 MVP epics, functional requirements, acceptance criteria and state-machine logic.
- **Ticket security:** Defined QR ticket security: anti-fraud validation, anti-replay and anti-counterfeit protection, and secure fare verification.
- **Go-to-market & stakeholders:** Built the launch go-to-market plan (rollout phases, rider adoption, communication) and lead alignment with Hitachi Rail's French stakeholder team and government operations teams.

Techne App (Event Engagement App – Techne Summit)
December 2022 – Present
Official networking platform of the Techne Summit, serving 25K–30K+ users per season.

- Redesigned the **AI-powered matchmaking engine** around interests, intent and engagement signals, driving **20K+ matches and meetings** through the app; **80%+ of on-ground summit meetings** were booked in the app.
- Delivered personalized agendas, AI-driven session recommendations and offline-first features for on-site use.
- Led **7+ seasonal release cycles**, including live-event deployments and on-site testing.

FinMate (AI Fintech MVP – Company Hackathon)
Dec 2024 – Feb 2025

- Built an **AI-powered personal finance MVP** with personalized insights, smart saving recommendations and localized behavioral nudges, owning rapid discovery, problem validation, scoping and end-to-end delivery.

Earlier Engagements (Intern & Associate PM): Discovery, scoping and feature delivery across **Tiro** (KSA – Food Delivery), **Seater** (EG – School Bus Platform) and **Kuzlo** (EG – B2B Wholesale–Retail).

Freelance & Ventures

Freelance Product Manager – Enara Platform (Social Commerce Startup, independent of TrianglZ)
Oct 2024 – Apr 2025 | London, UK
Owned the 0→1 build of a multi-sided marketplace connecting brands and creators.

- Defined the product vision, MVP and roadmap, turning manual brand–creator coordination into a structured platform.
- Authored the BRD and platform architecture: onboarding, product sync, creator storefronts and operational workflows.
- Designed **AI-driven matching logic** based on audience fit, content style and commercial intent.
- Led **Shopify and TikTok integrations** to automate operations and reduce manual work.
- Interviewed and integrated **50+ influencers and shops across the UK**.
- Delivered the proof of concept and pitch-deck support that helped the founders **secure seed investment**.

Co-Founder – Madera / Zodya
Aug 2017 – Jan 2021 | Alexandria, Egypt
Built and digitized an e-commerce brand for custom wooden and decorative products.
